PROJECTS

Bonafide Certificate Management: Html , CSS , JavaScript , Php

- This is a website for our college where student request for bonafide certificate and professor can accept or reject a request of student for bonafide.
- If request aceepted then bonafide automatically generated and send to student email and in case of rejected student notify by rejected message through email.

E-Dashboard: React , Node.js, Express.js

- This is simple project for CRUD operation and aunthentication .
- For the front end library React framework is used and in the backend use node.js,express.js and for database use MongoDB.
